EVALUATION OF SOURCE

EVALUATION OF CONTENT

1. The deadline for the dismantling of all equipment, including the remaining parts of the power plant, at Junkers-Dessau has been set for 15 December 1946.
2. An additional 1,500 men have been sent to the Junkers plant by the Dessau labor office to speed up the dismantling. Five hundred tons of dismantled material are being dispatched daily, according to source, who elaborates on this claim by stating that this really means five hundred tons dismantled, crated, and loaded per day--the equivalent of a freight train load.
3. Crate markings and shipments are for specific plant sections. The dismantling activities extend even to the excavation of ground cables.

This document is hereby regraded to
CONFIDENTIAL in accordance with the
letter of 15 October 1978 from the
Director of Central Intelligence to the
Archivist of the United States
